Introduction

Welcome to the WhatsApp Extension user guide. This extension allows you to integrate WhatsApp sharing functionality into your Magento store, enhancing social interaction and user engagement.

Configuration

General

Enable Extension
[store view] Yes

Select Yes to enable WhatsApp module on frontend.

Display Share On WhatsApp Button In All Products
[store view] Yes

If set to **Yes**, WhatsApp share button will be displayed in all products. If set to **No**, WhatsApp share button will only be visible on products with "Share On WhatsApp" option enabled.

WhatsApp Button Size
[store view] Medium

WhatsApp Button Label
[store view] Share

Set WhatsApp Button Label.

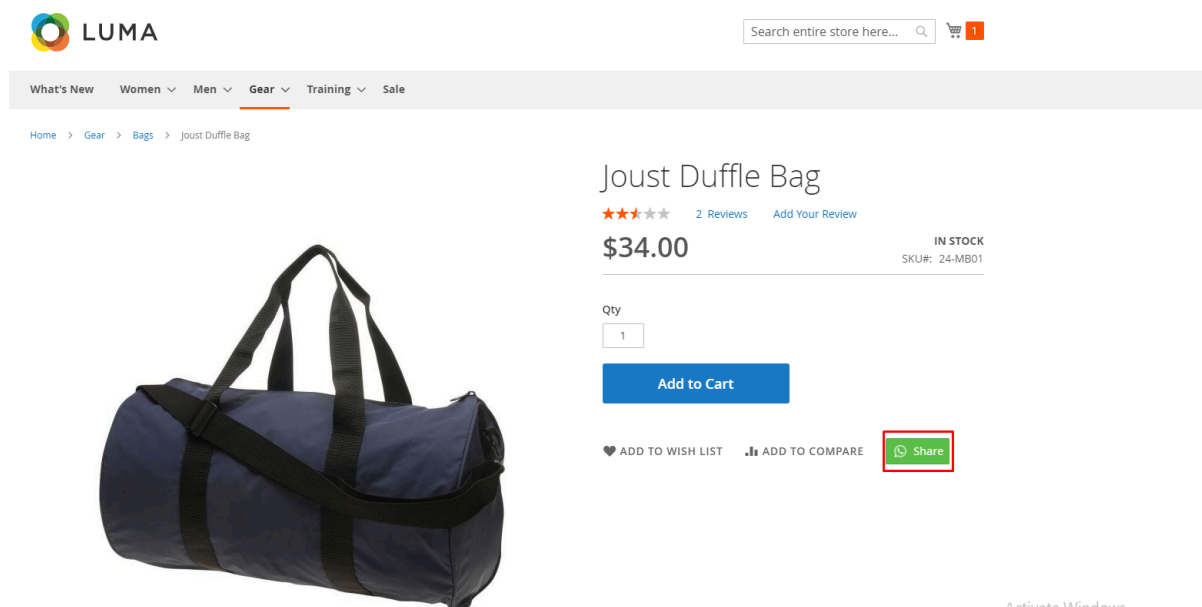

Extra Text For WhatsApp
[store view] Share on Whats App

Set Extra Text For WhatsApp Share Message.

Access Extension Settings

- In Magento Admin Panel, go to **Stores** → **Configuration** → **Mavenbird Extension** → **Share on WhatsApp**.

Using the Extension

Share Products via WhatsApp

- Navigate to any product page on your Magento store frontend.
- Click on the WhatsApp share icon or button integrated with the product details.

Select Contacts or Groups

- Choose a contact or group from your WhatsApp contacts list to share the product link with.

Customize Messages

- Optionally, personalize the message accompanying the shared product link before sending.

Troubleshooting

Extension Not Displaying

- Ensure the extension is properly installed and enabled in Magento Admin.
- Clear Magento cache and browser cache to refresh display.

Thank you!
